Adoption of LMS itslearning

PhD., Development Director Tuija Arola

New Skills Training

Objectives

- Support universities and academic teachers in providing distance learning by means of developing solutions that will permanently improve the quality of blended and digital teaching and learning.
- Use digital assessment tools to support assessment of students' competencies, the presentation of knowledge and reliable evaluation of skills acquired by students.
- Support the skills of academic teachers in using modern teaching and learning technology.

Organization and division of work

- A joint action plan in January.
- Eduko: pedagogical workshops, 3 workshops for each university
- Itslearning: technical workshops
- Eduko and itslearning representatives participated in each others workshops as observers.

Ready-made course – Learning by experimenting

- The theme was "A toolkit for distance work and distance learning".
- 5 modules with various resources and activities.
- The functionality of the ready-made course was tested before release.
- Participants were invited to test the course.
- The course was open to experimentation in February.
- 18 participants logged in.

Pedagogical workshops

- 2 x 3 workshops in March – April
- Facilitators: Tuija Arola and Suvi Aaltonen
- Presentation materials and templates
- A recording of the instructions
- Supplements to the itslearning ready-made course
- Evaluation and further development

Manual

- Conceptual and theoretical perspectives
- Learning experience design
- Technical tips
