Wymagania wstępne (przedmioty wprowadzające):

General knowledge in economics

Program przedmiotu:

1. Origins and history of European integration process
2. Theories and concepts of European integration (political and economic)
3. Development of the European Communities and European Union; stages of integration
4. Institutional structure and decision making processes in the EU
5. Creation and basis of the Single European Market
6. The EU's Foreign, Security, and Defence Policies; European Union External Relations
7. Justice and home affairs
8. Regional Policy of the European Union
9. Finances of the European Union: budget, revenues and expenditures, evolution of the budget, financial perspectives
10. The Common Agricultural Policy
11. Economic and Monetary Union
12. Democracy and the European Polity; enlargement and the future of the European Union

Metody dydaktyczne:

Lecture together with power point presentations

Cele przedmiotu:

The aim of the course is to acquaint student with history, basic rules, principles and policies of the European Union. Student should be able after this course to answer the questions: what is European Union? How and why it was created? What stages of the European integration process can we distinguish? What is the responsibility of each EU main institution? And the last, most general question: how does it work?

Warunki zaliczenia:

Written exam
